

GRESB Infrastructure Asset Certification Evaluation Form

General Information

For an Infrastructure certification scheme to be recognized by GRESB, the scheme must first meet the 5 minimum requirements (Listed in the Infrastructure Asset Assessment Reference Guide document, Appendix 9) and is then evaluated based on a set of predetermined criteria and themes to establish the tier of the certification.

The evaluation process is listed below:

1. The 5 minimum requirements for a certification scheme to be recognized by GRESB are:
 - ESG performance focused, and certified at asset-level.
 - The assessment process and criteria document/information are available and robust.
 - The technical development of the scheme is overseen by a governance body.
 - The certification is based on technical documentation review and/or on-site assessment.
 - The certification process is conducted by an independent and qualified professional.

2. Once the 5 minimum requirements are met, the certification scheme is added to the Infrastructure Certifications list as displayed in Appendix 8 of the Reference Guide document.

Directions for completing the form:

1. Complete all fields in the below tables
2. Thorough descriptions are required for each of the 5 requirements
3. Provide applicable sources and references to the descriptions provided
